THE CMRP PROGRAM

is the #1 credentialing program for certifying the knowledge, skills, and experience of maintenance and reliability professionals. It's more than just committing textbooks to memory; it's a thorough examination of your own expertise measured against a universal standard.

WHY THIS CERTIFICATION?

- The CMRP exam is accredited by ANSI, which follows ISO guidelines for its accreditation process. Other certification programs are not so distinguished.
- This program is not tied to any commercial ventures – it is unbiased and developed by individuals from companies in academics, government, industry, and utilities.
- The exam's content is all-inclusive, from equipment reliability and technical skills to asset management and communications.
- Gain confidence and authority by adding an internationally-recognized certification after your name.
- Further your career, and put yourself on a path to promotions with the best knowledge base in the industry.

The CMRP program is sponsored by the Society for Maintenance & Reliability Certifying Organization (SMRPCO).

WHO CAN GET THIS CERTIFICATION?

Every facility, small or large, should have Certified Maintenance & Reliability Professionals (CMRPs) on staff. CMRPs are critical employees when it comes to ensuring efficiency and productivity on site. You can rest assured that your CMRPs have the full body of knowledge and expertise necessary to ensure efficient operations – from technical skills and streamlined processes to performance management and managerial confidence.

Although the exam is rigorous, the CMRP status is attainable. Your day-to-day work is the best preparation for the exam, but we can help – we offer a handy Candidate Guide with an in-depth review of exam topics, and a thorough list of recommended reading.

Join thousands of others – worldwide – who have added value to their career by adding "CMRP" to their title.

CMRPs ARE:

- Junior & Senior Engineers
- Plant Managers
- Maintenance Managers
- Reliability Engineers
- Operations Leaders

ABOUT THE EXAM

Developed with no commercial bias, and covering the full breadth of maintenance and reliability expertise, the CMRP exam is a true measurement of your competence. From problem-solving skills and metrics consistency to negotiation and cost-effectiveness, the CMRP title is one that adds merit to your career.

Thorough Coverage of the Five Maintenance & Reliability Pillars

BUSINESS & MANAGEMENT

Strategic planning, working with stakeholders, measuring performance, managing risk, budgeting, and more.

MANUFACTURING PROCESS RELIABILITY

Ensuring safety; managing process and equipment change; understanding standards and specifications; and more.

EQUIPMENT RELIABILITY

Measuring performance levels and identifying gaps; establishing, enforcing, and reviewing maintenance strategy; avoiding production down time; and more.

PEOPLE SKILLS

Assessing employee competence, defining organizational structure, developing employee skills, communicating, and more.

WORK MANAGEMENT

Identifying work processes, developing work-plans and schedules, documenting current procedures, maintaining historical records, planning capital projects, using information technology, and more.

WHEN & WHERE YOU CAN TAKE THE EXAM

We make it easy to find the perfect place for you to take the exam. Whether it's at a designated testing site, on location, or electronically, there is a convenient testing spot waiting.

At an official CMRP testing site

From Florida to Seattle, the CMRP test is administered many times throughout the year. For a list of upcoming exam dates and sites, visit: www.smrp.org/SMRP_certification

At your facility

Become a Sustaining Sponsor and receive substantial discounts for employees to take the exam on location, on your own schedule. Visit: www.smrp.org/certs_standards_for_details.

At the SMRP Annual Conference

By far, the most popular time and place to take the CMRP exam is at the SMRP Annual Conference. It's an ideal place to not only test your current skills, but also see the latest industry trends firsthand, and network with your peers.

Online at hundreds of test centers

We've partnered with a computer-based training company to host exams at hundreds of sites around the world. Just register at the closest center and put your knowledge to the test. For a list of sites, visit: <http://www.isoqualitytesting.com/locations.aspx>
